Environmental and Health Controls on Lead 2023

Report Available Free of Charge

- The current document is the ninth revision in the series of reports on Environmental and Health Controls on Lead.
- In this latest version regulations, legislation, guidelines, and industrial initiatives have been gathered from **40 countries as well as the European Union**.
- This report represents a broad summary of the requirements in force, or proposed in the countries that are listed. As such it is intended only as a guide to the principal features of the controls affecting the lead industry.
- This edition **contains multiple links to official sources where more detailed information may be found**.
- In total, **373 of the most relevant regulations, legislations, directives, acts, standards and recommendations are listed** in 7 columns: Jurisdiction, Maximum Lead Level, Date of Operative, Title of Regulation, Current Status, Controlling Authority and Comments and Notes.

CONTENTS

INTRODUCTION

SECTION ONE

CHAPTER 1:

Control of Lead in Works: Lead in Air

CHAPTER 2:

Control of Lead in Works: Lead in Blood

CHAPTER 3:

Control of Lead in Works: Controls Other than Lead in Air and Lead in Blood

SECTION TWO

CHAPTER 4:

Control of Lead in the Atmosphere: Lead in Emissions

CHAPTER 5:

Control of Lead in the Atmosphere: Lead in the General Atmosphere

SECTION THREE

CHAPTER 6:

Control of Lead in Water: Lead in Industrial Effluents

CHAPTER 7:

Control of Lead in Water: Lead in Water

About the ILZSG

The International Lead and Zinc Study Group (ILZSG) was established within the United Nations in 1959 and, in 1977, became an independent intergovernmental organisation. Its main functions are to:

- Promote transparency in the global lead and zinc markets via the provision of up-to-date, accurate and continuous information on the supply and demand of lead and zinc and its probable development
- Facilitate co-operation between governments and industry via the organisation of biannual meetings and regular special conferences and seminars
- Conduct in-depth research into other issues of interest or concern to members via the completion of special reports and studies.

ILZSG is one of the longest established International Commodity Organisations and was the model for the creation of other similar bodies such as the International Nickel Study Group (INSG) and International Copper Study Group (ICSG).

Visit the ILZSG website at: www.ilzsg.org

As part of its efforts to promote global market transparency, **this report is being made available on a free of charge basis.**
